- **Peer to Peer: Reimagined - Dec 7 - 10, 2020 Online** [\[LINK\]](#)

Welcome Linda Vo, CaWEP's Program Associate

CaWEP is thrilled to introduce our newest staff member, Linda Vo! After a rigorous search and interview process, we know that Linda will be a huge asset to the CaWEP team and to all our members. Unfortunately, with the pandemic keeping CaWEP events online for now, we wanted to find a way for all our members and partners to get to know Linda. [Read our interview with Linda.](#)

Download the program and register today

Thank you to all our members and partners who submitted workshops for Peer to Peer: Reimagined. We're thrilled to announce our webinars and workshops for this year's unconventional annual event. [Download the program.](#)

Peer to Peer will take place over three days. Each morning, we'll hold two webinar sessions on important topics with top-notch speakers. The afternoons are "Choose Your Own Adventure" style. Attendees can select from a list of peer-developed and peer-run sessions from discussions, to technical trainings, to panels. Join us to reflect on this year and look ahead to what's next.

New Resource Now Available:

CA Code of Regulations: Spray Sprinkler Bodies (Title 20)

Beginning October 1, 2020, all Spray Sprinkler Bodies (SSB) must meet specific **performance requirements** and contain the proper **markings** in order to be legally sold in California.

[Download our FAQ](#) to learn more about what this new requirement means for outdoor programs and manufacturers.

Stay in the know with CalWEP. This is a member only resource.

CalWEP Takes QWEL Trainings Online

[Subscribe](#)[Past Issues](#)[Translate](#) ▼

After several months of planning and pivoting, CalWEP completed its first two completely online QWEL class series last week! Led by CalWEP's Senior Program Manager, Lisa Cuellar, and in partnership with 10 Bay Area water agencies, over 100 individuals attended the classes online with a mix of both pre-recorded content and live training with instructor Lori Palmquist.

Kudos to Lisa and the BayQWEL team for achieving this milestone as we all adapt to this new reality. If you are interested in bringing QWEL to your region, [email Lisa](#) to set up a time to connect.

Business Member News & Spotlight:

Flume Releases Next Generation Device

CalWEP member Flume released its second generation device this week. In addition to the whole home real-time water monitoring, leak detection, and water budgeting sported in the first iteration of the device, this second-generation product offers 5-second reads, end-use disaggregation, and completely upgraded hardware - improved battery life, improved WiFi range and connectivity, and more. [Check out their newly launched website to learn more!](#)

metrus

Metrus Energy is a full-service project finance company, providing project development and financing services for energy efficiency, water efficiency, energy storage, electric vehicle charging infrastructure and solar projects at commercial, industrial and public facilities. Our model reduces risk as you only pay for realized savings. This allows your operational savings to come from your operations instead of capital budget, where there is more competition from other projects. This method is expressed in the latest GASB guidance, and means that projects stay off your balance sheet.

Metrus has underwritten projects for more than a decade, in 26 different states using more than 30 different technologies to-date. If a capital project can be quantified using kWh, therms, water reduction or any other type of savings calculation we are interested in financing it.

Try looking at some types of technology and project lengths using our interactive calculator [here](#).

By valuing efficiency as a resource and enabling our partners to harness it, we've perfected a new paradigm for sustainability across every market sector and region. Metrus continues to break ground in the sustainable energy industry as we evolve our services and transform clean energy goals into reality.

For more information or any questions please contact Kip Barrett with Metrus at: 612-802-7088. Click here to [email](#) for case studies and to review possible projects.
