

Overview of California Statewide Codes and Standards Reach Codes Program

Who We Are

Utility-funded program with the goal of providing jurisdictions **technical support** to adopt energy ordinances, including those that include **water conservation**.

This includes ordinances adopted at the **local level** by individual jurisdictions to facilitate GHG and energy use reductions, and water savings, going beyond California minimum codes.

Our Objective: Facilitate Reach Code Adoption

- Perform cost-effectiveness analyses
- Develop model language
- Attend workshops/public meetings
- Create public-facing resources
- Highlight leading communities

Considering Reaching Out?

- Our services are paid for through ratepayer funds and are provided at **no cost** to jurisdictions.
 - Modify and develop model language
 - Provide engineering, codes, and standards expertise
 - Meet with and respond to stakeholder concerns
- Adoption of the code change is not required to ask for assistance.
- Resources are not limited to our current offerings, let us know if you have other needs!
