11:30 AM DIMs: Approaches and Associated Accuracy/Costs

*Andrew Brenner, NV5
What is needed to quantify the appropriate water use of a dedicated irrigation meter? Although CalWEP members and other suppliers have the ability to assess this question with in-house resources, to get to the most accurate answer can be time consuming. Andrew Brenner will break down the process into parts and look at the relative costs and accuracy of moving from a good enough solution to an accurate answer. The talk will also lay out the implications for water suppliers of the various paths to completion of this element of the urban water use objective.*

12:00 PM LUNCH - Provided by Regional Water Authority

1:00 PM DWR's Indoor Residential Water Use Study 2.0 (SB 1157)

*Kyle Miller, DWR
The Department of Water Resources WUE team has began their legislatively mandated study on the impacts a reduced indoor residential water use standard may have on urban water, waste water, and recycled water systems. A major aspect of this research includes a statewide residential end-use study. Hear from DWR about updates and way to engage.*

1:20 PM WUE Updates from State Water Board

*State Water Board Staff
State Water Board staff will join us to provide updates on their current activities related to the Making Conservation a California Way of Life regulation including what's ahead and an opportunity for attendees to provide feedback and suggestions for future efforts.*
